EDUCATION

E.G.S PILLAY ENGINEERING COLLEGE

B.E. in Computer Science and Business System -
2027 CGPA: 7.06

St Antony's Higher Secondary School

HSC - 2023
PERCENTAGE: 72%

SKILLS

LANGUAGES

Intermediate: JavaScript

FRAMEWORKS & LIBRARIES

React.js, Node.js, Express.js, Framer Motion, Prebuild UI

DATABASES

SQL,
MongoDB (NoSQL Database)

TOOLS & PLATFORMS

Git, GitHub, Visual Studio Code, Postman, n8n automation

Certificates

NPTEL Certificates

- Cloud Computing
- E-Business
- 5G Wireless Standard

Hacker Rank Certificates

- SQL Basics
- SQL Intermediates

Code Alpha

- Frontend Developer Virtual Internship
- Hackathon Certificates

Achievements

- **ODOO**-Hackathon (VIT-Pune 2026)
Finalist
- Pitch Craft Hackathon (Inter College 2026)

PROFILE

- Third Year **B.Tech** Computer Science Er Business System Student (2023-2027) with strong problem- solving abilities.
- Experienced in building responsive web applications using the MERN stack.
- Familiar with UI frameworks, REST Api's , and working with databases.
- Interested in creating user-friendly solutions that help organizations grow.
- Always eager to learn new technologies and work on meaningful projects.

PROJECTS

EGS(Learning Management System) | Final Year Project (Apr-2026)

- Built a MERN-based LMS for managing courses, assignments, and student workflows
- Developed RESTful APIs with Node.js and Express.js for system operations and data handling.
- Implemented JWT authentication with role-based access for Admin, Faculty, and Students.
- Added real-time chat using WebSocket for instant student-instructor communication.

Digital-Marketing (Go Advance) | Real World Project (Feb-2026)

- Developed responsive marketing web pages using React, Tailwind CSS, and Framer Motion to enhance user experience.
- Implemented SEO optimization techniques to improve website visibility and search engine ranking.
- Integrated Web3Forms for secure form handling and lead generation in digital marketing campaigns.

Embedded Systems Tutorial Platform | Intern Project (Apr-2026)

- Developed a scalable React-based tutorial platform with modular architecture and lazy-loaded routing.
- Built reusable components (Sidebar, Accordion, Layout) to enhance navigation and maintainability.
- Structured embedded systems content (Arduino, Raspberry Pi, ESP32) into progressive learning modules.

Problem Solving

(Solved 70+ Problems (Leet Code & Hacker Rank))
